Abstract

Mutual Funds provide a policy for a common investor to contribute in the Indian capital market with professional fund management irrespective of the amount invested. The Indian mutual fund industry is increasing rapidly and this is reflected in the increase in Assets under management of various fund houses. Mutual fund investment is less risky than directly investing in stocks and is therefore a safer option for risk averse investors. Monthly Income Plan funds offer monthly returns and invest majorly in debt oriented instruments with little exposure to equity. However it has been observed that most of the investors are not aware of the reimbursement of investment in mutual funds. This is reflected from the study conducted in this research paper. This paper makes an attempt to classify various factors affecting awareness of investors regarding investment in Mutual funds. The findings will help mutual fund companies to identify the areas required for improvement in order to create superior awareness among investors concerning investment in mutual funds.

Key Words: Attrition, Turnover intention.

I. INTRODUCTION

A Mutual Fund is a trust that pools the reserves of a number of investors who share a common financial goal. The money, thus collected, is then invested in capital market instruments such as shares, debentures and other securities. The income earned through these investments and the capital appreciation realized is shared by its unit holders in proportion to the number of units owned by them. Thus a Mutual Fund is the most suitable investment for the common man as it offers an opportunity to invest in a diversified, professionally managed basket of securities at a relatively low cost.

Monthly Income Plans or MIPs invest maximum of their total corpus in debt instruments while they take minimum exposure in equities. It gets benefit of both equity and debt market. These schemes rank slightly high on the risk-return matrix when compared with other debt schemes.

There is considerable amount of research being done regarding investment in mutual funds. However very little research has been done to study the awareness of investors regarding investment in mutual funds especially MIP funds.

II. REVIEW OF LITERATURE

Shanmugham (2000) conducted a survey of individual investors with the objective to find out what information source investor depends on. The results explained that they are economical, sociological and psychological factors which control investment decisions. Madhusudhan V jambodekar (1996) conducted his study to size-up the direction of mutual funds in investors and to identify factors that influence mutual fund investment decision. The study tells that open-ended scheme is most favored among other things and that income schemes and open-ended schemes are preferred over closed-ended and growth schemes. News papers are used as information source, safety of principal amount and investor...
services are priority points for investing in mutual funds.

Sujit Sikidar and Amrit Pal Singh (1996) conducted a survey to peep in to the behavioral aspects of the investors of the North-Eastern region in direction of equity and mutual fund investment. The survey showed that because of tax benefits mutual funds are preferred by the salaried and self-employed individuals. UTI and SBI schemes were most preferred in that region of the country over any other fund and the other funds had been proved archaic during the time of survey.

Syama Sunder (1998) conducted a survey with an objective to get an in-depth view into the operations of private sector mutual fund with special reference to Kothari Pioneer. The survey tells that knowledge about mutual fund concept was unsatisfactory during that time in small cities like Visakapatanam. It also suggested that agents can help to catalyse mutual fund culture, open-ended options are much popular than any other schemes, asset management company’s brand is chief consideration to invest in mutual fund.

Anjan Chakarabarti and Harsh Rungta (2000) emphasised the importance of brand in ascertaining competence of asset management companies. Raja Rajan (1997) underlined segmentation of investors and mutual fund products to increase popularity of mutual funds.

Objectives of Study

1. To revise the investment pattern of Indian Investor.
2. To find the type of plans of mutual fund ideal by investor.
3. To find out the importance of factors like liquidity, higher return, company reputation and other factors that influence investment decision of mutual fund holder.
4. To find out awareness level of investors regarding Monthly Income Plan fund.
5. To ascertain the most preferred factor for investing in MIP fund.

Research Methodology

Investor’s main objective is to earn higher returns keeping in mind the risk and liquidity factor. With this objective in mind, an investor is looking out for various investment avenues. Mutual funds offer comparatively better returns and have less risk as compared to direct investment in stock market. In this research paper, an attempt has been made to evaluate the awareness of investors regarding mutual fund investment with special emphasis on Monthly Income Plan funds.

A survey was conducted in Pune city during the period June 2017 to September 2017. A sample of 100 individual mutual fund investors were surveyed through a pre-tested questionnaire. The investors were selected on the basis of those who have made prior investment in mutual funds and have some knowledge about the basic terminologies involved with mutual funds. An attempt has been made to find out the awareness of investors regarding mutual fund investment and to identify the factors considered to be important by the investors before investing in any mutual fund. The awareness level of investors regarding Monthly Income Plan funds and their benefits is also studied.

Data Analysis

The data collected through the questionnaire is analysed considering each factor and the analysis is presented below.
From the above graph, we see that most of the investors belong to the age group of 19 to 35 years followed by those belonging to the age group of 36 to 50 years.
